

Ferrite Block Filtered PCB Connectors

Product Facts

- Offer economic EMI/RFI protection
- Matched pcb footprints mean "Drop-in" replacement for non-filtered connectors
- Choice of ferrite only or capacitive array on ferrite
- Connectors have industry standard interface
- Right-angle .318 and .590; vertical and stacked versions
- AMPLIMITE connector housing made of UL 94V-0 rated high temperature, thermoplastic for .318 and stacked versions
- Recognized under the Component Program of Underwriters Laboratories, Inc., File No. E28476
- Certified by the Canadian Standards Association, File No. LR 7189

These versatile and widely used pcb connectors are an inexpensive filtering method that eliminates the problem of conducted electromagnetic interference (EMI). Filtering options include ferrite only and capacitive array on ferrite.

- AMPLIMITE HD-22 Subminiature D Receptacle Connectors
- AMPLIMITE HD-20 Subminiature D Plug and Receptacle Connectors

AMPLIMITE HD-22 Receptacles are available in shell size 1, 15-positions with ferrite only and with capacitive array on ferrite.

AMPLIMITE HD-20 Plug and Receptacles are available in shell sizes 1, 2, and 3; 9, 15, and 25-positions, respectively with ferrite only and with capacitive array on ferrite.

AMPLIMITE HD-22 and HD-20 Ferrite Filtered Connectors are "Drop-in" replacements for non-filtered Subminiature D connectors with matched pcb footprints. Housings (except for .590 product) are made of high temperature, UL 94V-0 rated thermoplastic material. Low cost front metal-shells are compatible with full metal-shell cable connectors. Connectors

are available with 4-40 threaded insert mating hardware, and integral boardlocks to secure posted connectors to the pc board, prior to soldering.

To complete the interface, AMPLIMITE HD-22 and HD-20 cable connectors are available with a choice of termination styles including; crimp snap-in, solder cup, posted contacts, and insulation displacement contacts. For additional information request AMP Catalog 82068.

Ferrite Block Filtered Connectors Performance Specifications

Electrical Characteristics

Ferrite Only

Operating Voltage—100 VDC
max.—AMPLIMITE connectors.

Dielectric Withstanding Voltage—
250 VDC—AMPLIMITE

Insulation Resistance—
500 megohms, min.

Equivalent Circuit (L-type):

Typical Impedance vs. Frequency (.070 [1.78] thickness)

Refer to AMP Spec 108-1521

Capacitive Array on Ferrite

Operating Voltage—100 VDC
max.—AMPLIMITE connectors.

Dielectric Withstanding Voltage—
250 VDC—AMPLIMITE

Insulation Resistance—
500 megohms, min.

Equivalent Circuit (LC type):

Typical Insertion Loss vs. Frequency

• Measured in a 50 ohm system per MIL-STD-220 at 25°C

AMPLIMITE HD-20 Filtered Connectors—.318 Footprint (Continued)

Material and Finish:

Housing—Thermoplastic, 94V-0 rated, black, SMT compatible

Metal Shell—Steel, plated .000200 [0.00508] min. tin over .000100 [0.00254] min. copper

Eyelets—Brass, plated .000200 [0.00508] min. over copper flash

Boardlocks—Copper alloy, plated .000200 [0.00508] min. tin-lead over .000050 [0.00127] min. nickel

Inserts—Zinc, plated clear chromate

Contacts:

Pins—Brass, duplex plated, .000030 [0.00076] min. gold on mating end, .000120 [0.00304] min. tin-lead on solder end, all over .000050 [0.00127] nickel underplating

Plugs—Ferrite Block and Capacitors
